Work Experience

Viacom • Software Engineering Intern • New York

Summer 2016

- Developed an internal tool using d3.js to visualize Git repositories in order to analyze software development practices.
- Worked closely with the Video Player Team to develop live-streaming support for MTV VMA's over MTV Apple TV app using tvOS and TVML.

PhoneLab • Systems Researcher • Buffalo, NY

Feb 2015 - Present

- Working towards quantifying and prioritizing smartphone Quality of Experience (QoE).
- Developing an offline-processing pipeline to analyze on-screen user interactions and events such as touch events, progress bars, screen freezing, etc.
- It combines low-level Android Logging (platform instrumentation) and analysis to measure the length of time user waits for apps to complete certain actions.

University at Buffalo • Computer Science TA • Buffalo, NY

Fall 2016

- **CSE 250 Data Structures in C++**
 - Hold office hours to help students one-on-one with course material and programming assignments.
- **CSE 199 How Internet Works**
 - Develop activities for students to help them better understand internet.
 - Interact with students one-on-one during the class while they are working on activities.

Software Projects

(more at github.com/brijeshrakholia)

BridgeOS - An Instructional Operating System | C

Spring 2016

Developed BridgeOS by implementing larger OS subsystems (three subsystems mentioned below) from scratch onto previously developed instructional OS/161 kernel at Harvard.

- **Synchronization Primitives**
Implemented synchronization primitives such as mutex locks, conditional variables, and reader/writer locks.
- **File System Calls and Process Support**
Designed and implemented the file system syscall interface (read, write, close, lseek, dup2, chdir), and process support (exec, fork, waitpid) so that user-programs can be executed by launching a simple shell.
- **Virtual Memory (top 1% of the class)**
Carefully designed and successfully implemented virtual memory, including address translation, TLB management, page replacement, and swapping – without any memory leaks.

For more info please visit ops-class.org, and if you need access to the codebase then please email me.

Muvis (muvis.herokuapp.com) | JavaScript, HTML, CSS

Muvis is a music visualizer using d3.js developed at Spotify Music Hackathon

Robotic Arm (tiny.cc/roboticarm) | JavaScript

Designed a robotic arm to follow the movements of my hands in 3D space using leap motion and arduino.

Education

University at Buffalo

B.S Computer Science
Expected May 2017

Relevant Courses

Operating Systems, Database Concepts, Robotic Algorithms, Software Engineering, Algorithms, Computer Organization, Linear Algebra, .

Skills

Leadership & Awards

- Hackathon mentor at MLHPrime 2016, held at Bell Works.
- Taught 40+ high school kids intro to programming in India.
- Mentored Team India for FIRST Championship at St.Louis 2013. Won Best Teamwork Award.
- Lead developer for FIRST Championship at Germany 2012 and got felicitated by Narendra Modi after winning the Champions Trophy.

Preferred Tools and Languages – C++, C, Java, HTML, CSS, Vim, Node.js, Express, Git, Markdown, and AsciiDoc

Familiar Tools and Languages – JavaScript, Python, ES6, Ionic, Three.js, Paper.js, D3.js, MongoDB, Angular, Heroku, Atom, Jira, and Confluence.
